

The following are lists of World Meteorological Organization (WMO) Headings and Advanced Weather Interactive Processing System (AWIPS) Identifiers for Common Alerting Protocol (CAP) alerts by Weather Forecast Office. The list is separated by National Weather Service (NWS) regions and the National Centers for Environmental Prediction (NCEP) centers. Note the six (6) XOaaii CCCC CAPxxx identifiers for the national centers at the end of the listing are included as placeholders for future use. CAP v1.2 national center messages are not now being created for pull or push methods.
