

Farmed Cervid Chronic Wasting JSDA Farmed Cervid Chronic Wa Disease Management and **Response Activities 2023 Cooperative Agreements**

2023 Spending Plan

September 2023

2023 Spending Plans for the Farmed Cervid Chronic Wasting Disease Management and Response Activities 2023 Cooperative Agreements

USDA APHIS Veterinary Services (VS) is awarding \$5.27 millionⁱ through 20 Cooperative Agreements to 12 State departments of agriculture and five universities. The funded projects listed below will allow recipients to further develop and implement CWD management, response, and research activities in farmed cervids, including surveillance and testing.

Farmed Cervid Management Projects			
Project Title	Entity	Funding Amount	
Genomic Predictions for Selective Breeding to Reduce Susceptibility to Chronic Wasting Disease (CWD) in Farmed White-tailed Deer (Odocoileus virginianus) farms participating in the Louisiana Department of Agriculture and Forestry's CWD Herd Certification Program (HCP)	Louisiana Department of Agriculture and Forestry	\$52,500	
Genomic Predictions for Selective Breeding to Reduce Susceptibility to Chronic Wasting Disease (CWD) in Farmed White-tailed Deer (Odocoileus virginianus) in Indiana	Indiana State Board of Animal Health	\$197,860	
The Development and Integration of a Comprehensive CWD Herd Certification Plan (HCP) and Incorporation of Unmanned Aerial Vehicle (UAV) Technology to Enhance the Regulatory Management of Farmed Cervid Operations in Georgia	Georgia Department of Agriculture	\$90,385	
Expanding Outreach to Cervid Farmers and Veterinarians in States Participating in USDA's CWD Herd Certification Program	Iowa State University Center for Food Security and Public Health	\$247,043	
Missouri's farmed white-tailed deer herd management utilizing predictive genetics	Missouri Department of Agriculture	\$228,500	
Depopulation of CWD-positive herds and CWD- exposed animals in Wisconsin	Wisconsin Department of Agriculture, Trade and Consumer Protection	\$1,791,021	
Genomic Predictions for Selective Breeding to Reduce Prevalence of and Susceptibility to Chronic Wasting Disease (CWD) in Farmed White-tailed Deer (Odocoileus virginianus)	Wisconsin Department of Agriculture, Trade and Consumer Protection	\$244,622	
Farmed White-Tailed Deer Herd Management Plan Utilizing Predictive Genetics	Pennsylvania Department of Agriculture	\$249,525	
Improving chronic wasting disease surveillance of captive deer facilities in Texas using a model- informed adaptive management approach	Auburn University	\$103,976	

RA CWD Microshin Inconting	Donneylyania	¢60.242
PA CWD Microchip Incentive	Pennsylvania	\$60,242
	Department of	
	Agriculture	A 4 5 0 6 0
Enhancing Missouri's Chronic Wasting Disease	Missouri Department of	\$45,069
Program through training, outreach, and distribution	Agriculture	
of resources and educational materials		
Validation of a Minimally Invasive, Rapid, and	Texas Tech University	\$249,665
Sensitive Biomarker-Based Test for Ante-Mortem		
Detection of Prion Infection in Farmed Cervids		
Next Generation Predictive Genetics For Differential	Texas A&M University	\$249,443
Susceptibility to Chronic Wasting Disease in Farmed		
White-tailed Deer and Elk		
Identification and characterization of CWD	University of Texas	\$249,831
contaminated meats		
New York farmed white-tailed deer herd testing	New York State	\$242,916
utilizing predictive genetics	Department of	
	Agriculture and Markets	
Oklahoma farmed white-tailed deer herd testing	Oklahoma Department	\$248,703
utilizing predictive genetics	of Agriculture, Food,	, -,
	and Forestry	
Kansas farmed white-tailed deer herd management	Kansas Department of	\$71,734
utilizing predictive genetics	Agriculture	<i>+ · _ / · •</i> ·
Increasing the efficacy of Illinois' Chronic Wasting	Illinois Department of	\$115,275
Disease (CWD) Certification Program and improving	Agriculture	<i>y</i> 11 <i>3,273</i>
management and disease surveillance of farmed	, ignouncer c	
cervid herds by training accredited veterinarians and		
herd owners in the collection and submission of		
satisfactory samples for CWD testing		
Response to first CWD detection in Florida ⁱⁱ	Florida Department of	\$220,163
	Agriculture and	γ220,103
	Consumer Services	
		¢200.000
CWD response in Michigan [®]	Michigan Department of	\$300,000
	Agriculture and Rural	
	Development	
	Total	\$5,258,473

ⁱ APHIS used the remaining \$980,000 announced in the farmed cervid opportunity to fund awardable proposals submitted to the wild cervid or tribal funding opportunities due to a lack of awardable farmed cervid proposals.

ⁱⁱ APHIS funded the Florida and Michigan cooperative agreements non-competitively due to a lack of awardable farmed cervid competitive proposals.
