Material Ingredient Reporting

Manufacturer’s Inventory for SuperPaint® with Sanitizing Technology* Coating:

This shall serve as the Manufacturer’s Declaration of the Chemical Inventory for the LEED Material Ingredient Reporting credit for the SuperPaint® with Sanitizing Technology product line, manufactured by The Sherwin-Williams Company.

For more information about Sherwin-Williams, please visit: www.sherwin-williams.com. Or, for more information about the product, please consult its Product Data Sheet available at www.paintdocs.com.

Description of the SuperPaint® with Sanitizing Technology product line:

The SuperPaint® with Sanitizing Technology product line consists of the following product which has the corresponding US GHS Classifications for its specific formulation.

Product Name	SW REX Series	US GHS Product Classification
SuperPaint® with Sanitizing Technology	A87W00001	CARCINOGENICITY - Category 2

Description of the Manufacturer’s Inventory Assessment:

In this assessment, we have disclosed the chemical content of all ingredients present at >1000 ppm (0.1%) in this product line base formulation, the respective GHS hazards associated with these chemicals, and their function/role. This inventory does not include colorants. In order to protect our confidential business information, specific quantities and CAS numbers are not reported for all chemicals. Additionally, chemicals with the same role have, in some cases, been aggregated into one line item.

When reviewing this document, it is important to consider that the potential hazards of the raw materials may not be relevant in the final, post-reacted product given that materials will often transform, be encapsulated, etc. As such, the information in this document shall not be utilized to make claims regarding product safety and/or to predict risk to end-users.

Information contained in this declaration has been verified by NSF as complying with LEED v4.1 Material Ingredient Reporting – Manufacturer Inventory criteria. Documents containing formula information were provided to NSF that represented each product line so that NSF could ensure accuracy throughout their review. These documents were exclusively shared with NSF to ensure business confidentiality. This information will be updated as necessary as reformulations or changes to GHS classifications occur. Additionally, this document will be internally audited by Sherwin-Williams annually to ensure correctness.

Any questions on this declaration should be sent to sustainability@sherwin.com.

*EPA registered paint that kills 99.9% of Staph (Staphylococcus aureus), E. coli (Escherichia coli), MRSA (Methicillin-resistant Staphylococcus aureus), VRE (Vancomycin-resistant Enterococcus faecalis) and Enterobacter aerogenes on painted surfaces within two hours of exposure. And continues to kill 90% of certain bacteria for up to four years when the integrity of the surface is maintained.

Expires 6/11/2024 or upon issuance of a newer form

Raw Material Composition for SuperPaint® with Sanitizing Technology:

Material/Role	Content Range	GHS Classification(s)
Water CAS#: 7732-18-5	35%-50%	Not classified.
Extenders	15%-30%	Not classified.
Titanium Dioxide CAS#: 13463-67-7	15%-35%	CARCINOGENICITY - Category 2
Resins	10%-25%	Not classified.
Surfactants	<5%	Not classified.
Additive	<1%	Not classified.
Coalescent	<1%	Not classified.
Antimicrobial Active Ingredient	<1%	CORROSIVE TO METALS - Category 1
		ACUTE TOXICITY (oral) (dermal) - Category 4
		SKIN CORROSION/IRRITATION - Category 1B
		SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 1

The information contained in this material ingredient disclosure is accurate to the best of Sherwin-Williams' knowledge at the time of writing based on the information provided to us by our raw material suppliers.
