NO. 1.

DESERET ALMANAC,

FOR THE YEAR OF OUR LORD

1851:

THE THIRD AFTER LEAP YEAR, AND, AFTER THE 6TH
OF APRIL, THE 22^D YEAR OF THE CHURCH OF
JESUS CHRIST OF LATTER DAY SAINTS; AND
THE FIRST OF THE LAST HALF CENTURY
OF THIS DISPENSATION.

CALCULATED FOR LATITUDE 43° 45' AND LONGITUDE
111° 26'—GREAT SALT LAKE CITY:
ACCOMPANIED WITH NOTABLE EVENTS, ETC.

COMPILED BY W. W. PHELPS.

G. S. L. City, Deseret:

Printed by W. Richards.

ECLIPSES FOR 1851.

There will be two eclipses of the Sun and two of the Moon this year:

I. A partial eclipse of the Moon, Jan. 17th, 1851, at 9 h. 15m. Visible on the Eastern continent.

II. An annular eclipse of the Sun, Jan. 31—to us invisible, but may be seen at the cape of Good Hope, Feb. 1, at 5 in the morning.

III. A partial eclipse of the Moon, July 12th, 11h. 6m. in the forenoon, and visible.

IV. A total eclipse of the Sun, July 28th. Begins on the earth generally at 12h. 14m. A., in longitude 103° west and latitude 3° north. Central eclipse begins at 1h. 25m. A., in longitude $137^{\circ} 4'$ west, and latitude $53^{\circ} 43'$ north. Ends on the earth generally at 4 54m. Great Salt Lake City and Deseret will have their share in this heavenly sight, independent of any other State or nation.

NAMES AND CHARACTERS OF THE PLANETS.—☉ ☽ Sun, ☾ Moon, ☿ Mercury, ♀ Venus, ⊕ Earth, ♂ Mars, ♃ Jupiter, ♄ Saturn, ♆ Herschel.

♀ Venus will be the Morning Star until the 11th of October, the Evening Star to the end of the year.

The signs, usual in Almanacs, are omitted as matters of antiquity, which never had nor never will have a being or body (as presented by old Almanac-makers) on earth or in heaven.

—

EXPLANATION OF THE CALENDAR PAGE.—Month &c., length of days and changes of the Moon on the top of the page. The first column contains the days of the week; the second the day of the month; the space between joining contains notable events, observations, &c.; the third, the rising of the Sun; the fourth, the southing of the Sun; the fifth, the setting of the Sun; the sixth, the southing of the Moon; and the seventh, the southing of some of the planets and fixed stars.

The abbreviations are d. for day, h. for hour, m. for minutes, s for seconds, and M. morning and A. afternoon.

To read the southing of the Sun: say, on the 25th Jan. the sun is slower than the clock or watch 12m. and 33s:—as appears by the shade of a Dial, on the meridian line. Again: On the 3d day of November the sun is faster than the clock or watch 16m. 16s., for either well regulated clock or watch only says 11h. 43m. 44s. while the Dial casts its shade on the meridian or X

clock line. Thus, because the sun does not every day
run just 24 hours through the year, we have to use a
mean, or clock time, instead of dial or apparent
time.

The southing of the Moon was considered of more im-
portance than part setting and part rising, the old fashion-
ed way.

The elements of the Eclipses are taken from the
Astronomical Almanac.

The most of the arbitrary characters, as well as the
fables and wonders, are omitted as useless.

THE CENTER OF THE HEAVENS.

Up in the heavens above,
Where the life giving power is spread,
Undivided,

There is a fountain of love,
Where the priesthood in virtue, as head,
Hath presided,

Over planets and stars, and their beings, forever.

High in those mansions, so bright,
Where the footsteps of men never tread,
In probation,

There is a fountain of light,
Where true wisdom and knowledge is spread,
In rotation,

To the millions of worlds and their people, forever.

Right in the centre of this,
Is a throne, where our Father sits crown'd
With his neighbors,

Here is the spirit of bliss,
Which the wisdom of man never found
By his labors,

Even light, which is life to creations, forever.

BEGINS ON WEDNESDAY, AND HAS THIRTY-ONE D

First day, 9h. 14m. long. 15th day, 9h. 31m. long.
