The 8-hour ozone standard is written such that attainment is met if the 3-year average of the 4th max. value from each of the 3 years is less than or equal to 70 ppb.

This table provides information on the 4th max. values for 2022 and 2023, the current 4th max. value for 2024, the current 3-year average, and the max. possible level for 2024 in order to remain in attainment of the ozone standard. Based on the current values, projected max. possible levels for 2025 are also included.
